PROFESSIONAL SUMMARY

Software Developer with skills in Java, Python, JavaScript, and the MERN stack, with hands-on experience building full-stack web applications. Strong foundation in data structures and algorithms, with experience in cloud deployment using AWS. Eager to contribute to scalable and high-impact software solutions in an Agile environment.

EDUCATION

B.Tech in Computer Science, SR University, Warangal **2022 - 2025**
CGPA: 7.3/10 Telangana, India

SKILLS

Programming Languages	: Java, Python, JavaScript(ES6+)
Frameworks/Libraries	: Spring Boot, Django, Flask, FastAPI, NumPy, Pandas
Web Development	: MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML5, CSS3
Cloud and DevOps	: AWS (EC2, S3), Azure, Docker, Kubernetes, Jenkins, CI/CD
OS / Developer Tools	: Linux, Windows, Git, GitHub, VS Code
Database	: PostgreSQL, MySQL, MongoDB
Certifications	: Java (Udacity) AWS Cloud (Udacity) Project Management (Coursera)

INTERNSHIPS

* **EY Global Delivery Services | Full Stack Developer Intern | Remote** **Nov 2024 - Jan 2025**

- Built and deployed a full-stack E-Commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), delivering a responsive and scalable user experience
- Optimized frontend performance using React.js component architecture, achieving page load times under 2s across all major product pages
- Designed REST APIs for product, user, and order management, ensuring efficient data flow
- Deployed the application on AWS (EC2 + S3), configuring cloud infrastructure for production-grade reliability and availability
- Collaborated with cross-functional teams to deliver features on schedule, contributing to API integration and frontend-backend communication

PROJECTS

Hotel Reservation System | Java, OOP:

- Built a command-line reservation system using core Java, applying OOP principles (encapsulation, inheritance, polymorphism) with a multi-layer architecture (UI → API → Service → Model)
- Implemented room search, booking, and admin workflows with date validation and conflict-free reservation logic to prevent overlapping bookings
- Developed a dynamic room recommendation feature (+7 days fallback) and robust exception handling, improving system reliability and handling edge cases

Custom E-Commerce Website | MERN:

- Developed a full-stack e-commerce platform using the MERN stack (MongoDB, Express.js, React.js, Node.js), building scalable RESTful APIs and responsive UI components
- Designed and optimized MongoDB data models with structured collections for efficient product and user data management
- Implemented user authentication and core features such as product management and API integration, improving application usability and performance
